

Brainspotting

Brainspotting & Parts Work

Online

Seminar Objectives

Through lecture, live demonstration and small group practice participants will learn to do the following:

- Demonstrate ability to identify, track, and attune to client's parts.
- Identify and understand tracking of physiological reactions of the client.
- Distinguish when to use implicit vs. explicit parts work.
- Evaluate affect tolerance and Limbic countertransference through attunement with client and self.
- Apply, practice, and integrate interventions with Brainspotting when needed with parts work.

Who

Classes are open to all counselors, psychologists, and students who are curious and seek to expand their knowledge.
