

Brainspotting

Phase I

St. Louis, MO

Introductory/Beginning Level Three day 21-hour live training in-person training OVERVIEW:

Brainspotting is a brain-based therapy based on hypothesis that specific eye positions designated as "brainspots" activate and access specific area of the midbrain that allow for the reprocessing and releasing of core neurophysiological reactions to trauma-related and other psychological experiences. In addition, brainspotting is built on a model that emphasizes therapist-client presence and attunement in the healing process. As an open and integrative model, brainspotting is adaptable to many different areas of specialization and can be integrated with other treatment models.

In this introductory Brainspotting Phase 1 training, participants will learn four basic brainspotting techniques. In addition, participants will receive and overview of the:

- standards of care and professional practice for brainspotting practitioners,
- research that supports the primary assumptions of brainspotting; and
- challenges of research and evidence-based treatment for conditions such as Complex PTSD

LEARNING OBJECTIVES

Participants of this introductory level course participants will be able to:

1. Summarize the standards of care and professional practice of the International Brainspotting Association.
2. Describe the hypothesized neurological underpinnings of how brainspotting works.
3. Summarize the research that supports the hypothesized way in which eye positions activate and accesses midbrain activity.
4. Explain the uncertainty principle as it relates to brainspotting.
5. Describe the concepts of simultaneous neurobiological and relational attunement.
6. Explain the importance of client-therapist attunement during brainspotting.
7. Explain how the treatment frame is set and held by the therapist.
8. Explain the role of focused mindfulness in brainspotting.
9. Discuss the similarities and differences between the activation and resource models of brainspotting.
10. Explain the concept of limbic countertransference.
11. Demonstrate a basic mastery of the use of the outside window brainspotting technique.
12. Demonstrate a basic mastery of the use of the inside window brainspotting technique.
13. Demonstrate a basic mastery of the use of the gaze spot brainspotting technique.
14. Demonstrate a basic mastery of the use of the resource model of brainspotting technique.
15. Assess the appropriate brainspotting techniques for the treatment of Post-traumatic stress disorder, including the Dissociative Subtype, and other trauma-related symptoms.
16. Describe two challenges to assessing and providing evidence-based treatment to individuals with Complex PTSD.

SCHEDULE:

Who

Classes are open to all Social Workers, MFTs, LPCs, Mental Health Counselors, Chemical Dependency Counselors, Psychoanalysts and Psychologists and graduate level students who are curious and seek to expand their knowledge.

Earn 21 CE's for training (*Additional Cost*)

When

May 11th - May 13th, 2022
9:00 am - 5:30 pm

Where

Questions

Paul Lindberg - Office Manager
paul@getconnected.works

Registration begins at 8:30 am on the first day.

Training runs from 9am - 5:30pm each day.

For cancellation policy, CE disclosure, purchasing CE's and agenda for this training see [registration page](#).

Evaluations and certificates will be available after the course completion www.ceuregistration.com

There is no conflict of interest or commercial support for this program.

Cherie Lindberg

*Brainspotting Trainer & Consultant,
MSE, LPC, NCC*

Cherie Lindberg, is the owner of Get Connected Counseling & Consulting, LLC, has been in the counseling field for more than 20 years. She is a Licensed Professional Counselor, Nationally Certified Counselor, Brainspotting Trainer & Consultant. She is also certified in Imago Relationship Therapy and trained in EMDR. Her specialties include performance enhancement, life transitions, personal growth, anxiety disorders, marital therapy, stress management, PTSD, and ego state therapy.

Melanie Young

Melanie Young

Dr. Melanie Young received her PSYD from the University of Denver, School of Professional Psychology. She has over 34 years of clinical experience and has been in private practice for 24 years. She works with couples and individuals. She assists adolescents, adults and seniors in overcoming difficulties with trauma, mood issues, anxiety, grief, brain injuries, ADD, and chronic illness. She was first trained in Brainspotting in 2007 and is a trainer and consultant. She can be contacted at info@melanieyoungpsyd.com.
